

Scepter®

PVC ELECTRICAL CONDUIT

LETTER OF COMPLIANCE

Scope:

This letter of compliance covers requirements for Schedule 40 and 80 **PVC Electrical Conduit**. These products meet or exceed performance standards set by CSA International (CSA), the National Electrical Manufacturers Association (NEMA), and Underwriters Laboratories Inc. (UL).

Scepter® PVC Electrical Conduit is typically used for industrial, commercial and residential applications. These applications include residential single and multi-family dwellings, fish processing plants, bridges and tunnels, car washes, sewage treatment plants, pulp and paper, utilities, cable, food processing plants, agriculture, airports, marinas, water treatment plants, street and highway lighting, and communications.

Material:

Rigid Poly(Vinyl Chloride) (PVC) used in the manufacturing of **Scepter® PVC Electrical Conduit** is compounded to give superior physical properties in the finished product. All products are grey in colour.

Extruded Conduit:

Extruded Conduit conforms to the following standards, when applicable:

CSA C22.2 No. 211.0 “*General Requirements and Methods of Testing Nonmetallic Conduit*”

CSA C22.2 No. 211.1 “*Rigid Types EB1 and DB2/ES2 PVC Conduit*”

CSA C22.2 No. 211.2 “*Rigid PVC (Unplasticized) Conduit*”

NEMA TC2 “*Electrical Plastic Tubing (EPT) and Conduit (EPC-40 and EPC-80)*”

UL 651 “*Schedule 40, 80, Type EB and A Rigid PVC Conduit and Fittings*”

Marking: **Scepter® PVC Electrical Conduit** are marked in accordance with CSA and NSF requirements, where applicable. The conduit is marked “Sunlight Resistant”.

Note: *Modifications to our products may occur at any time without notice. Should you require that a product meets a given standard or application, you must ensure that the information provided herein is current by consulting with an IPEX Electrical Inc. representative.*

Best Regards,

Jeff Gallant

Vice President, Manufacturing
