

NEW PRODUCT SHOWCASE

NEW 2½" Cor-Line ENT & Kwikon Fittings Provides 25% More Space

An industry first, IPEX Electrical is pleased to expand its Cor-Line® ENT and Kwikon® Fittings package to 2½". The new size is designed to accommodate larger aluminum conductors that are used in slab construction today by adding 25% more usable space than 2" ENT.

2½" Cor-Line and Kwikon are CSA approved for power and datacom in both direct burial and concrete encased applications and include all the same labour saving features that contractors have come to appreciate.

BENEFITS:

- Flexible and lightweight
- Concrete-tight
- Pull-out resistant joints
- Fire resistant
- Impact resistant

FEATURES:

- 25% more space than 2" ENT
- New 2½" size fits aluminum 250mcm 4 conductor
- Unique locking tab design makes installation quick and easy
- Creates a FT-4 fire-rated system
- Cor-Line ENT is flexible enough to withstand crushing and breaking

2-1/2" COR-LINE & KWIKON
