

ELECTRICAL COMPONENTS INTERNATIONAL

Service is Everything!

PRODUCTS AND SERVICES

ECI produces wire harnesses and leads, complex harness sub-assemblies, radiant glass heaters, power cords and we perform contract manufacturing capabilities. All products and services are designed to provide total cost solutions to our customers. The ECI manufacturing process includes cutting and termination, splicing / sealing and heat shrink, molding, assembly and testing. Products are made worldwide and distributed to top-tier customers in a wide variety of industries.

All ECI products and services come with a commitment to excellent customer service from new product implementation to technical support after shipment. Our experienced staff ensures that customer needs are anticipated and met on projects ranging from a wire lead to an 800 circuit assembly.

ECI Manufactures the following products:

HARNESSES AND WIRE LEADS

ECI has over 50 years of experience manufacturing wire harnesses and leads. Our wire harnesses are configurations of wire or cables cut to specific lengths and finished on their ends with connectors or plugs used to distribute electricity in finished goods. ECI harnesses can be found in the top brands worldwide in a variety of industries including: home appliances, transportation equipment, heating, ventilation and air conditioning (HVAC) products, construction and agricultural equipment, and vending and industrial machines.

ECI also specializes in providing the North American motor vehicle market with harnesses, ignition cables, molded parts, electro-mechanical assemblies, engine block heaters and battery blankets. ECI provides fully integrated manufacturing capabilities with a wide range of technical services including product design, applied engineering, custom manufacturing and integration of wire and wire-related products.

POWER CORDS

ECI manufactures custom electric cords and cord sets. Our products vary in length and termination, and are made to meet our customers exacting standards and agency approvals. Products can be found in consumer products worldwide.

ELECTRO-MECHANICAL ASSEMBLIES

We provide a variety of assembly services for component products used in numerous industries including home appliances, transportation and many others. ECI has the ability to build complex control boxes, electrical consoles and other sub-assemblies utilizing our expertise in facilities around the world.
