Helping "green" the work place environment by identifying **Environmentally Preferred Products** for your application needs.

To address the growing need to improve Environmental, Health and Safety issues surrounding maintenance chemicals, **CRC** has established **Environmentally Preferred Products** in key categories. *By definition, these products have been specifically formulated that when compared to the current product, reduces or eliminates the environmental impact of the use of the product. Use of these products will reduce hazardous waste generation, reduce hazardous air emissions and help provide a cleaner, safer, healthier work environment, while still providing the high performance **CRC** is known for in each application.*

To qualify as an **Environmentally Preferred Product (EPP)**:
- Each formula will not contain:
  - Ozone Depleting Chemicals
  - SARA reportable ingredients
  - Any ingredients that are listed as carcinogens
  - CA Proposition 65 ingredients
  - Hazardous Air Pollutants

- Each formula will have a minimum of two of these criteria:
  - No VOC or low VOC content
  - Renewable resource
  - Not classified as a Hazardous Waste
  - Biodegradable
  - Do not contain Nonyl Phenols
  - Do not contain Phosphates
  - Do not contain Heavy Metals
CRC's Environmentally Preferred Products in Key Categories

**SOLVENT BASED DEGREASERS**
In addition to the attributes listed on the other side, products in this category will also have a minimum of 2 of these attributes:
- No VOCs or low VOC content
- Renewable resource
- Not classified as a Hazardous Waste
- Biodegradable

**WATER BASED DEGREASERS**
In addition to the attributes listed on the other side, products in this category will also have a minimum of 4 of these attributes:
- No VOCs or low VOC content
- Not classified as a Hazardous Waste
- Do not contain Nonyl Phenols
- Renewable Resource
- Do not contain phosphates
- Biodegradable

**PRECISION CLEANERS**
In addition to the attributes listed on the other side, products in this category will also have these attributes:
- No VOCs or low VOC content
- Not classified as a Hazardous Waste

**LUBRICANTS/CORROSION INHIBITORS**
In addition to the attributes listed on the other side, products in this category will also have a minimum of 2 of these attributes:
- Do not contain heavy metals
- No VOCs or low VOC content
- Not classified as a Hazardous Waste
