

KK VDE Torque Tools Set 15IS

- For Phillips screws
- Ductile and tough for hard materials
- Torsion design against premature wear
- 1/4" hexagon drive (Wera connecting series 4)
- Suitable for AEG, ARO, Atlas-Copco, Biax, Black & Decker, Bosch, Buckeye Tools etc.

Article description

Wera torque tools permit torque-controlled tightening to prevent damage to screws or work pieces and to ensure the dependability of the screw connection. This makes labour-intensive drilling-out of the screw and unproductive downtimes a thing of the past. Also important whenever repeat accuracy is needed. Includes the ergonomic Kraffform handle that clicks audibly and noticeably when the desired torque is reached.
