

### Aluminum Conduit Benders

Our Aluminum Conduit Benders feature high contrast markings for the best visibility allowing you to easily and accurately make bends. A reinforced hook and provide you with added durability while a secure double bolted handle won't loosen after repeated use. The conduit pipe bender shoe features the most bending references as well as a wear-resistant reference chart for easier use. Offset multipliers are featured on the shoe while 30°, 45°, and 60° center of saddle bend notches and a back of 90° bend indicator allow you to easily and accurately bend conduit.

**Application - 3/4" EMT, 1/2" Rigid, 1/2" IMC** (48-22-4071)
