

### High Visibility Performance Safety Vests

Our ANSI Type R Class 2 High Visibility Performance Safety Vest is designed to carry more. The high visibility safety vest has 15 pockets including a clear ID holder, rear tablet pocket, and 3 internal pockets, providing you with added storage. All front pockets are reinforced with durable 600D tear resistant materials capable of withstanding rough job site conditions. To reduce pressure around the neck, we incorporated a comfortable padded collar. The safety vest features a quick internal size adjustment providing you with a better fit as well as a durable pass-through slit for fall protection gear. The internal size adjustment allows you to wear the same vest in the summer over a t-shirt or in the winter over a jacket. Additionally, a zipper closure on the safety vest provides you with ultimate job site security. Our high visibility reflective vests are required if you are working around traffic going 25 mph or working around heavy machinery. This includes construction, road construction, traffic direction, utility crews, and survey crews. Yellow and orange color options are available, as well as CSA compliant safety vests.
