

### Fiberglass Bolt Cutter with PIVOTMOVE™ Rotating Handles

Our Fiberglass Bolt Cutters with PIVOTMOVE™ Rotating Handles are engineered to give you the best access and are available in 18" and 24" sizes. The adaptable rotating handles allow you to make more cuts around obstacles common in utility environments. The fiberglass bolt cutters are 1000V UL classified to provide you with added security. The forged steel bolt cutter blades are custom heat treated for maximum durability. Bolt Lock secures the pivot bolts to prevent loosening. The 18" bolt cutters have slim ergonomic handles allowing for comfortable use in multiple orientations. The MILWAUKEE® Fiberglass Bolt Cutters with PIVOTMOVE™ Rotating Handles have lanyard holes integrated through the handles for easy tethering.
