

NEW U-LINE® GROUND FAULT CIRCUIT INTERRUPTER FOR PORTABLE PROTECTION

“APPLETON VERSATILITY”

U-Line® GFCIs and receptacles have always provided safety in design and convenience in function. The new portable GFCI provides required ground fault protection for portable electrical devices. Meets all UL and CSA requirements for ground fault protection in both hazardous and non-hazardous locations. They can be used in conjunction with U-Line factory-sealed Model B receptacles or standard 5-20R receptacles on 20A, 125VAC branch circuits.

Appleton is once again delivering versatility.

U-Line® Receptacle with Ground Fault Circuit Interrupter

Appleton delivers yet another competitive advantage!

- Appleton is the only manufacturer to provide a Class I, Division 1 and 2 rated portable receptacle/GFCI combination.
- Provides open neutral protection to maximize safety for plant personnel.
- Portable 125VAC receptacle/GFCI for use in hazardous or wet locations.
- Complies with UL 943 for portable GFCI protection.
- Provides ground fault protection in accordance to OSHA requirements for 20 amp receptacles without GFCI protection.
- Smooth operating stainless steel test and reset buttons.
- Highly visible pilot light indicates GFCI is engaged and receptacle is ready for use. Pilot light is available in green or red, LED or incandescent.
- Lightweight copper-free aluminum construction.
- Convenient carry/hanging cable.
- Heavy duty 3' SO power cord with rugged U-Line 20A NEMA 5-20P plug.
- Compatible with competitors comparable receptacles. Our U-Line receptacle also accepts their respective plugs.

AMPERAGE	PILOT LIGHT	CLASS I, DIVISION 1 AND 2
20	Green LED	U2023PGFID1G3
	Red LED	U2023PGFID1R3
