This offer is only available at participating authorized NAPA Tool & Equipment retailers.

You must purchase a qualifying tool between October 1, 2015 and December 31, 2015.

Your claim must be postmarked on or before January 15, 2016.

To receive your rebate you must include the following:

A redemption form completed in its entirety. Download the attached file located at the end of this answer.

Original NAPA sales receipt(s) or sales invoice(s) dated between 10/01/2015 and 12/31/2015. Photo copies will not be accepted (except for RI residents). It is recommended that you make a photo copy of all submitted materials for your records. Note: To resolve any potential questions or issues regarding your submission, you may be required to mail or fax these copies.

Original UPC barcode cut from the outside product packaging of the DEWALT product purchased.

In a stamped envelope mail the above items to:

DEWALT  
DWRP113  
PO Box 42833  
Towson, MD 21284

Please allow 5-7 weeks for delivery. To check the status of your rebate please call 866-444-5290.

Thank you for your interest in DEWALT tools. It has been our pleasure to

provide this information. For additional details, disclaimers and exclusions please read the fine print found on the rebate form.

### DeWalt says it ALL, had others no compention!

Buy one because in the end if you don't you'll have to buy the cheaper ones more often and pay for it. This drill the DCD780C2 comes with carrying case , two batteries, charge station, and the best drill out there! I love my drill and the endless use points me to a truth! Nothing beats a DeWalt cordless drill! Truth never Contradicts it's self! Point made, just go buy the most Awesome Drill on the market, you will in the end save money and time. Yellow and black baby Runs smooth and Awesome, Truly! Rate it out of 5 a big 10+! Now looking in to buy a bigger battery for this awesome product the best of the best is not fair because it is my Only go to drill! Keep up the great work DeWalt!

PROS:

Just a Real Man's tool.

CONS:

There is none to post.

## top tool

love the power in this tool. Have owned two other major brands and this one wins hands down. Power and run time is incredible. I do high end remodeling and tools like this one make it easy.

**PROS:**

brushless run time

**CONS:**

none

## Best

Have owned three other brands of oscillating tools including the original Fein. For a battery powered tool this thing will easily outrun ANY of the ones I owned in the past. Very powerful, well designed as far as comfort and use. Dewalts batteries and brushless motors cant be beat. LOVE IT..!!

**PROS:**

brushless-run time, tooless head

**CONS:**

N/A

## Great tool for any job

I got the corded version from dremel for Christmas from my parents and used it a few times and liked it. So I loaned it to a friend while I was remodeling my kids bath room ( not thinking I would need it). Man do I miss that tool. So I went to the local big box hardware store and bought this tool already having the 20volt drill and impact gun. What an awesome tool. I like it way better than my corded tool. Just feels great in your hand and love the light on the end of the tools. I will not be in any hurry to get the other one back. I have found that the blades are interchangeable from all the other brands so no biggie. Great job dewalt keep up the good work

**PROS:**

Vey well thought out. Super useful

**CONS:**

1 battery only

## Better than Expected - By a huge leap better

This tool has worked great for fine trim work on an old craftsman house, It is able to get in really tight places, often by just adjusted the quick release, I can change the blade angle and get the sweet cut painlessly. That quick-release along with the slow start makes this product in a league of its' own.

By the way it can starts very slow but after it starts if you want super-slow just release the variable trigger and the speed will drop down 2 more levels. I couldn't imagine using the "other brands" 'dial speed' adjuster - the DeWalt Trigger adjust beats the competition hands down. By letting you change speed during a cut and adapt in real-time you get the perfect cut every time and that rocks!. The light is nice especially that it stays on 15 seconds after you cut.

I have a ton of past projects that this would have been a perfect fit for - I wish this was around a long time ago. It will be getting a lot of use in my future. I see it replacing complicated (time consuming) complex cuts and many chisel and hammers approaches. I bet that I can cut in half the time I spend with set up And still get the same quality if not better quality with this tool. It operates very smoothly going into a cut, there is not jumping around when you start. And when you want to move through material try a slight back and forth movement (¼ inch) and you can haul. This tool also feels safe and you may quickly became complacent... It hasn't happened yet but I would caution myself not to burn my fingers readjusting the blade too quickly (wait a second for it to cool).

### PROS:

The variable speed can go slow down to allow the most delicate work, The quick release tool from cutting to sanding, The light weight, grip is small and seems to fit my hand very well

### CONS:

This kit does not have half round blade like the corded kit, the kit picture didn't show the limit guide on the box but it was included (could be a 'Pros')
