Description:

Flat-top design provides more storage capacity for tall, bulky items, plus a large work surface for jobsite plans. Recessed and concealed lock protector inhibits forced entry and corrosion to lock. Channel reinforcements on lid lock side panels into lid for added security when closed. Hinged lower shelf allows for easy storage of larger objects (except Model 3360). Angled handle recess prevents pinch points. Hemmed (reinforced) high-strength shelves. Continuous, non-removable hinge pins help prevent theft. Side-wall storage (except Model 3360). Strategically located, easily accessible, durable gas-springs provide for ease in opening lid. Double hinge cover folds up and out of the way. Angled 3-1/2" high support skids. Load ramp for storage of larger, heavier items (Model 4872R only). Optional casters are available separately for easy mobility.
