

ProLume®

Compact Fluorescent Lamps

Recommend Energy Savings & Low Maintenance. Recommend ProLume® CFLs.

Compact fluorescent lamps are being specified for a growing number of applications, especially where the objectives are energy savings and reduced maintenance costs. ProLume® has become the popular choice for many distributors and end-users because of assortment, availability and reliability. In fact, they save up to 80% in energy costs and last up to ten times longer than standard incandescent lamps.

Offer your customers an assortment of CFL lamps, including Bare Spirals, Decoratives and Reflectors in a wide range of color temperatures and wattages, from 5 to 105 watts.

For a full product listing and specifications, visit our website at www.halcolighting.com and view our Literature Library.

Long Life Means Low Maintenance

ProLume CFL lamps achieve up to 12,000 hours average rated life. That means end users benefit from reduced costs and hassles involved with frequent lamp replacement.

Saving Energy is Cool

Achieve up to 80% energy savings compared to incandescent with ProLume CFL lamps that provide up to 69 lumens per watt. With significantly lower operating temperatures than incandescent and halogen, ProLume CFL lamps are a cool choice for a wide range of applications.

Assortment Equals Opportunities

We offer a wide assortment of ProLume CFL lamps for a variety of applications. CFL lamp types include T2 and T3 bare spirals, T2 ultra-compact full spirals and covered lamps including A-Line, globes, chandelier, tubular, reflectors and PAR lamps, in an assortment of color temperatures that vary by lamp: 2700, 3000, 3500, 4100, 5000 and 6500K. In order to expand the applications for which specific lamps may be used, E12, E26 and GU24 base types are available in a variety of lamp types and wattages. Furthermore, we offer a selection of color lamps in blue, green, red, yellow and black light-blue. Dimmable and 3-way lamps are also available for specific applications.

Dimmable CFLs Are A Brilliant Option

ProLume Dimmable CFL lamps are a smart choice for use with analog dimming systems. Not only can you achieve additional energy savings by using our dimmable lamps, end users will benefit from their long life (up to 10,000 hours average rated life), resulting in reduced maintenance. Also, our impressive assortment will meet a wide range of applications — available in 15 and 23 watt bare spirals, 15 watt R30 and 23 watt R40.
