The Milwaukee Advantage

Milwaukee's 3-Flat Secure-Grip™ Hammer-Drill Bits provide superiority in regards to quality, performance and longevity of life. The 3-Flat Secure-Grip™ shank is designed to fit in all 1/2 in. three jaw hammer-drill chucks and reduces the possibility of the bit spinning in the chuck during heavy torsional loads. The bits drill faster and last longer than other hammer-drill bits on the market due to their reinforced flute geometry and carbide tip design. Milwaukee's offering has a range of diameters from 1/8 in. to 1 in. with lengths up to 18 in. Five piece kit.

1/2 in. Pistol Grip Dual Torque Hammer-Drill, 0-1350/0-2500 RPM with Case

1/2 in. Single Speed Hammer-Drill Kit

Features

Fast drilling

Long life

3-Flat Secure-Grip™ prevents bit from slipping in the chuck

Comprehensive offering with diameters from 1/8 in. to 1 in. with lengths up to 18 in.
