

MCC Unit Renewal Program for Mining Industry

Westinghouse Series 2100 Unit

With its MCC Renewal Unit Program, Eaton is continuing a 40-year tradition of being the undisputed leader in electric power distribution and control to the mining industry. All renewed units will hold the UL® 845

listing that all new MCC (Motor Control Center) units hold. Eaton offers all Westinghouse® and Cutler-Hammer® vintage MCC units as well as many other manufacturers' units.

MCC Aftermarket Vintage Types—All UL 845-Listed

Name Brand	MCC Type	Vintage
Westinghouse	11-300	1935–1965

Allen-Bradley®	Centerline	1971–Present
Square D®	Model 5/Model 6	1992–Present
Siemens®	Series 89	1979–2001

Powering Business Worldwide

MCC Unit Renewal Program

The Hartford Service Center is an extension of Eaton's main MCC manufacturing plant. It is able to renew older, used MCC units in the mining industry to a "like-new" condition.

When to use

- When your MCC unit needs to have its stabs fixed, a starter or breaker is broken in the unit or your unit just needs a simple refurbishment.
- When environmental elements have degraded the integrity of the unit.
- When you want to upgrade the technology in your MCC unit.
- When you need assurance that you have a UL 845-listed MCC unit but don't want to invest in a new unit.
- When a new unit is not economically feasible. Eaton offers a discounted multiplier toward the purchase of our renewal MCC unit from the Hartford Service Center.

Why use Eaton's Hartford Service Center?

- The local plant understands the needs of the mining industry.
- You get greater reliability with Eaton than with unknown third-party refurbishing.
- MCC units are tested to ensure that the manufacturer's specifications are met.
- You get a simple and convenient solution with quick turnaround on many MCC styles.
- You get a one-year manufacturer's warranty.

Service Center Capabilities

- Stocks all current Eaton MCC units, as well as many of the vintage Cutler-Hammer and Westinghouse units.
- Lead times on aftermarket units as quick as one day!
- Custom wiring capabilities and local engineering support to enable you to get the exact unit for your application. This makes it easy for "plug and play".
- Custom services available such as trip unit upgrades and frame or trip unit replacement.
- Builds complete MCC add on structures to match up to your existing MCCs.
