

EPR KITS FOR CONDUIT REPAIR

EPR Kits from IPEX are the first total repair systems for broken and damaged PVC conduit. They offer fast and easy repairs for damaged conduit caused by actions such as earth excavation, horizontal and core drilling.

With unique interlocking joints, the EPR Kits' two half shell bell by bell pieces simply close around the installed wire and cable. Using standard PVC solvent cement, EPR Kits are quickly and easily assembled and connected, restoring the conduit to its original form.

EPR Kits are manufactured of high-impact and non-conductive PVC, ensuring a life long quality repair for your system. All sizes are 24 inches in length.

PE FUSION BONDING SYSTEM

PE Fusion is a high strength modified acrylic adhesive, formulated to chemically bond a variety of dissimilar materials.

The PE Fusion Bonding System is an excellent polyethylene adhesive for the connection of HDPE pipe to standard PVC fittings and other non-standard materials such as fiberglass, LDPE, ABS and polycarbonate. It is ideal for use with IPEX's EPR Kits to easily complete a repair of damaged HDPE conduit.
