

1. PRODUCT SUMMARY

The Primex Fiber Transition Outlet (FTO) is a quick-splice solution that manages up to 3' of fiber drop cable. This scalable, adaptable enclosure offers flexible entry ports, two fusion splice holders, and room for two fiber adapters with buffer tube management.

2. PRODUCT DIMENSIONS

Inside H: 4.5" / W: 5.3" / D: 1.1"

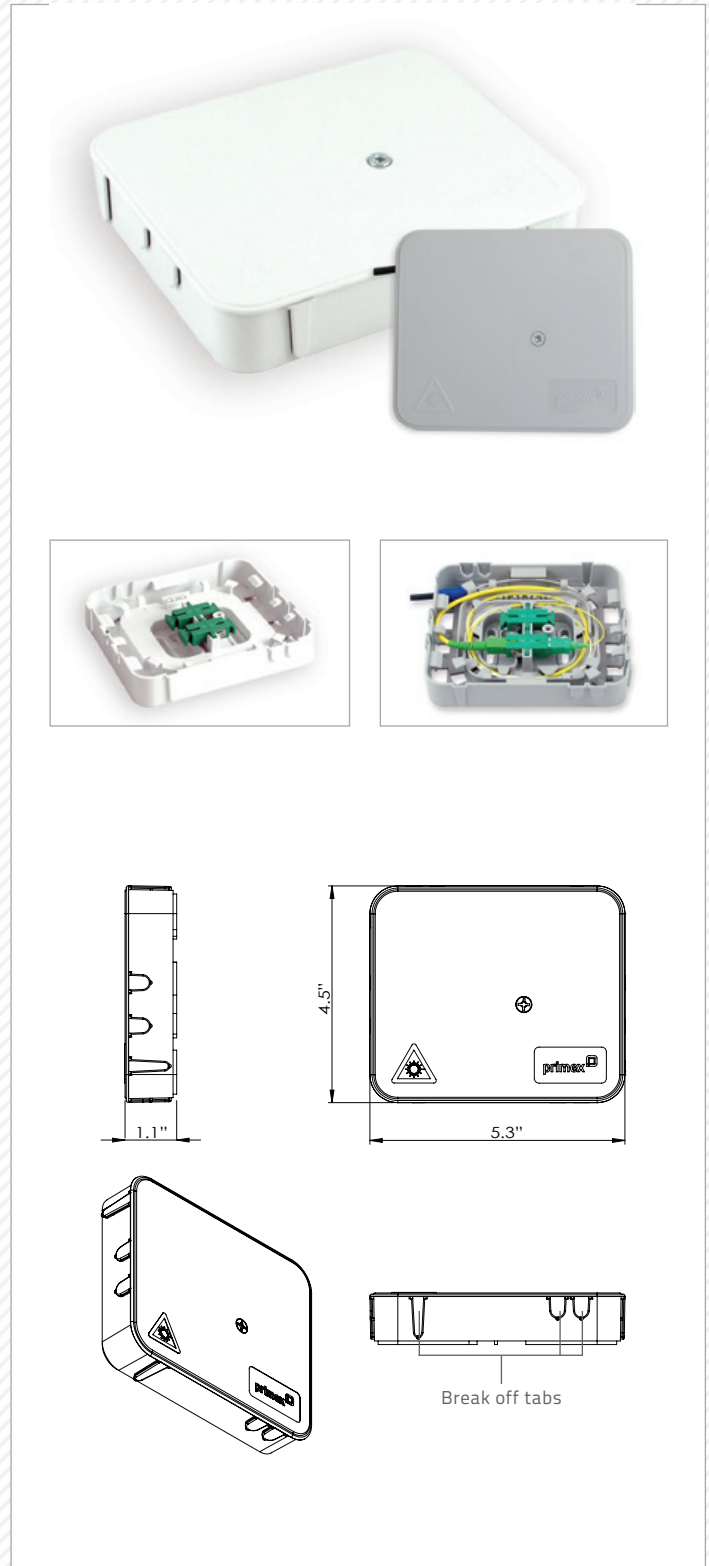

3. FEATURES & BENEFITS

- Up to 3' of fiber drop cable management with a protective lid.
- Two fusion splice holders with buffer tube management.
- Break-off tabs allow optional entry and exit ports.
- Stackable for large fiber counts.
- Fiber adapters stored internally for added protection.
- Can be used as an optical wall outlet.
- Available in PVC for outside use in Primex enclosures or ABS for inside stand-alone use.

4. CONFIGURATIONS
