FULL INFORMATION

DESCRIPTION

Whip them through the air and hear them sing. We've added a real working saw on the back of the 12.88-inch 3Cr13 black Cutlass blade with double ground teeth that cut deep. Extended out of the back of the rubber handle is a spiked tang for pounding and scraping. There are even holes in the handle to mount lanyards.

Kubrick machete

Just O K. The saw top side is to thick . Takes a lot to cut even a small limb . My mistake , didn't realize it was made over seas , would not have bought it .

Recommendation No
